PROFILE

Senior software developer with 25+ years of hands-on experience, ranging from Java/JavaEE backend systems to modern full-stack web applications (React, Angular, Node.js). In recent years I have built strong applied skills in AI and data: large language models (LLMs), RAG architectures, multi-agent systems (LangChain/LangGraph), machine learning with Python/PyTorch, and data pipelines. Based in Dornbirn, Austria, and open to freelance/consulting engagements as well as a permanent role in the Bodenseeraum (Vorarlberg, Lake Constance, St. Gallen).

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, JavaEE, Python, JavaScript / TypeScript, C, SQL
- **Full-Stack Development:** React, Angular, Node.js
- **AI / ML & Data:** LLMs, RAG architectures, LangChain / LangGraph, PyTorch, Machine Learning, Data Pipelines
- **Other:** Algorithms & Data Structures, Software Testing & QA, Debugging, Technical Mentoring

PROFESSIONAL EXPERIENCE

Independent Consultant — Software & AI Development — Tunisia 2019 – Present

- **Talan (France-Tunisian Branch):** supervised and contributed closely to an AI-powered data visualization platform automating the migration of analytics dashboards between heterogeneous BI platforms.
- **Capgemini Tunisia:** supervised and contributed to PharmaLink — a multi-actor web platform connecting patients, pharmacies and administration, with automated prescription reading and pharmacy stock/reservation management.
- Deepened hands-on skills in Python, AI/ML (LLMs, RAG, PyTorch) and data pipelines; relocated to Dornbirn, actively learning German for local integration.

Software Engineering Trainer & Technical Mentor — TVTC (Technical and Vocational Corporation), Saudi Arabia 2013 – 2019

- Delivered technical and vocational consulting and Applications development in software development and mentored junior developers within TVTC, Saudi Arabia's national technical and vocational training authority.

Senior Software Developer — SNCFT (Tunisian Railways), Tunisia 2010 – 2013

- Senior developer on a large-scale rail operations management system — wagon and train management, GPS tracking and scheduling — built with Java/JavaEE.

Earlier career (Tunisia): solutions architecture & IT consulting — including TunisAir's first online payment system and the CMAI inter-country information system — and early ERP development in C (Onlysoft: Delice, Meublatex).

EDUCATION

- Engineering Degree in Computer Science — Tunisia, 1994
- DEA (Diplôme d'Études Approfondies) in Computer Science — 1997

CERTIFICATIONS

- NVIDIA — Fundamentals of Deep Learning
- AWS Cloud
- *Microsoft — Azure AI Fundamentals
- *Azure Cloud

LANGUAGES

French — Fluent • English — Strong proficiency • German — Beginner (actively learning) • Arabic — Native
